

Ultraviolet Spectroscopy

Future Directions in

A Conference Inspired by the accomplishments of the
Far Ultraviolet Spectroscopic Explorer Mission

Highlighting recent results from ultraviolet spectroscopy, with an eye toward
the science drivers that will inform future ultraviolet mission concepts.

October 20-22, 2008 • Annapolis, Maryland USA

Topics:

Magellanic Clouds
Starburst & Active Galaxies
Interstellar Medium & Nebulae
Stellar Abundances & Processes
Disks & Protoplanetary Systems
Current & Future UV Missions
Deuterium in the Milky Way
IGM & Missing Baryons

Scientific Organizing Committee

co-chairs:

George Sonneborn	Warren Moos
William Blair	Jay Holberg
Michael Crenshaw	William Keel
Andrea Dupree	Jeff Kruk
Edward Fitzpatrick	Anthony Moffat
Cynthia Froning	Kenneth Sembach
Carol Grady	Evan Skillman
Guillaume Hebrard	Michael E. Van Steenberg

Workshop Location

Westin Annapolis
